General Information

Camping on Lake Weissensee means relaxing on „Playground of Nature“ in the middle of a 76 km² large natural park. Lakeshores without buildings, crystal clear water - the visibility from the surface to the ground is more than 11 m - with drinking water quality, no through traffic and a unique natural landscape award a top-ranking significance to the 11 km long lake in these times.

Although the water temperature of the lake reaches 25°, the lake is frozen from the beginning of December until the end of March and therefore the largest frozen surface in the Alps. The surface is serviced professionally. Die trails and rinks are freed from the snow, scavenged and shaped with special equipment. The fame of Lake Weissensee as an eldorado for ice skating is well known all over Europe especially in the Netherlands, Europe`s number 1 ice skating nation. Therefore every year thousands of ice skaters gather in January and the beginning of February on Lake Weissensee participating in several competitions and cheering the world`s best professional long-distance ice-skaters.

Well selected and prepared cross country tracks cover the area and if the snow suits also the surface of the lake. A total of more than 60 km cross country skiing runs are available.

The family skiing area Naggl Alm is located directly before your camp mobile or trailer.
